## HOW TO USE THE FAMILY CHARTS

Below are some pieces from a chart, to show how to use them. First, the oldest known ancestor and his wife are listed. All available data on them is shown beneath their names. Next their family is listed in the order of birth. This is "I GENERATION". Then, taking each child in turn, the family groups headed by each child are "II GENERATION". Each succeeding generation then shows in the same way the children's families as we come forward to the present.

INDEX NUMBERS: Oldest known ancestor is #1. His children are numbered to the right of his 1 (11, 12, 13, ...). Each child then has his children numbered to his right. #13's children would be 131, 132, 133, ... For numbers higher than 9 we use A (for 10), B (for 11), and so on. Note that for #11324, as example, his father would be #1132, his grandfather #113, and so forth.
